- 1. observed with senses
- 2. determined without destroying matter

- 1. indicates how a substance reacts with something else
- 2. matter will be changed into a new substance after the reaction

#### Identify the following as a chemical (C) or physical property (P):

- \_\_1. blue color
- 2. density
- \_\_\_\_\_3. flammability (burns)
- \_\_\_\_\_4. solubility (dissolves)
- \_\_\_\_\_5. reacts with acid
  - <u>6</u>. supports combustion
  - \_\_\_\_7. sour taste

## **PHYSICAL CHANGE**

- 1. a change in size, shape, or state
- 2. no new substance is formed

#### \_8. melting point

- 9. reacts with water
- 10. hardness
- \_\_\_\_11. boiling point
- \_\_\_12. luster
  - \_\_\_13. odor
  - \_\_\_\_14. reacts with air

## **CHEMICAL CHANGE**

- 1. a change in the physical and chemical properties
- 2. a new substance is formed

#### Identify the following as physical (P) or chemical (C) changes.

- 1. NaCl (Table Salt) dissolves in water.
- \_\_\_\_\_2. Ag (Silver) tarnishes.
- \_\_\_\_\_3. An apple is cut.
- \_\_\_\_\_4. Heat changes  $H_2O$  to steam.
- \_\_\_\_\_5. Baking soda reacts to vinger.
- \_\_\_\_\_6. Fe (Iron) rusts.
- \_\_\_\_\_7. Alcohol evaporates .
- \_\_\_\_\_8. Ice melts.

- 9. Milk sours.
- 10. Sugar dissolves in water.
- 11. Wood rots.
  - 12. Pancakes cook.
- \_\_\_\_13. Grass grows.
- 14. A tire is inflated.
  - 15. Food is digested.
  - \_\_\_\_16. Paper towel absorbs water.

# Physical and Chemical Changes

#### Part A

Can you recognize the chemical and physical changes that happen all around us? If you change the way something looks, but haven't made a new substance, a **physical change** (P) has occurred. If the substance has been changes into another substance, a **chemical change** (C) has occurred.

| 1. | An ice cube is placed in the sun. Later there is a puddle of water. Later still the puddle is gone. |  |
|----|---|--|
| 2. | Two chemical are mixed together and a gas is produce.   |  |
| 3. | A bicycle changes color as it rusts.  |  |
| 4. | A solid is crushed to a powder.   |  |
| 5. | Two substances are mixed and light is produced.   |  |
| 6. | A piece of ice melts and reacts with sodium.  |  |
| 7. | Mixing salt and pepper.   |  |

| 1.  | Umm! A student removes a loaf of bread<br>hot from the oven. The student cuts a slice<br>off the loaf and spreads butter on it.  |  |
|-----|--|--|
| 2.  | Your friend decides to toast a piece of<br>bread, but leaves it in the toaster too long.<br>The bread is black and the kitchen if full of<br>smoke.                                  |  |
| 3.  | You forgot to dry the bread knife when you washed it and reddish brown spots appeared on it.   |  |
| 4.  | You blow dry your wet hair.  |  |
| 5.  | In baking biscuits and other quick breads,<br>the baking powder reacts to release carbon<br>dioxide bubbles. The carbon dioxide<br>bubbles cause the dough to rise.                  |  |
| 6.  | You take out your best silver spoons and<br>notice that they are very dull and have<br>some black spots.   |  |
| 7.  | A straight piece of wire is coiled to form a spring.   |  |
| 8.  | Food color is dropped into water to give it color.   |  |
| 9.  | Chewing food to break it down into smaller<br>particles represents a change,<br>but the changing of starch into sugars by<br>enzymes in the digestive system represents<br>a change. |  |
| 10. | In a fireworks show, the fireworks explode giving off heat and light.  |  |

### Part C: True (T) or False (F)

| Changing the size and shapes of pieces of wood would be a chemical change. |  |
|--|--|
| In a physical change, the makeup of matter is changed.                     |  |
| Evaporation occurs when liquid water changes into a gas.                   |  |
| Evaporation is a physical change.  |  |
| Burning wood is a physical change.   |  |
| Combining hydrogen and oxygen to make water is a physical change.          |  |
| Breaking up concrete is a physical change.                                 |  |
|  |  |
